ABOUT

As a Senior Front-End Engineer with over 5 years of experience in web development technologies, I have a strong background in computer science. My passion lies in developing responsive, scalable, and cross-platform web applications using JavaScript tools. With extensive experience in both front-end and back-end development, I possess a deep understanding of core web development technologies. Additionally, I am constantly learning new tools and technologies to keep myself ahead of the curve and am excited to take on new challenges in the field.

Holding IELTS general training score 7.0 — expiration date: 2023

EXPERIENCE

Senior FrontEnd Developer (Full Time)

March 2021 - Now

Divar

Tehran, Iran

Divar is the largest and leading horizontal classifieds platform in Iran, boasting over 40 million users and more than 500,000 daily ads.

- Developed features using the latest software engineering practices and methods, focusing on clean, highly available, scale-able, and reusable components for large-scale enterprise applications.
- Analyzed and maintained Divar's UI Component library, which was built using React.js with Storybook. This helped to reduce development costs and decrease the time to market for new features and verticals, while ensuring high quality standards. As a result, the delivery velocity increased by more than 40
- Actively participated in overall DX sessions to find and tackle problems regarding slow development which outcomes in documenting in 3 levels, resulting in more than 70% less similar problems for juniors.
- Maintained overall code quality and faster design to release process by code reviews. Performed 120+ code reviews just for a single project.
- I Revised parts of technical decisions and protocols to implement a more robust system. As a result, our "new unhandled" issues in Sentry went 50% less.
- Designed and introduced a solution for more rapid, automated, and reliable UI Kit dependency updates in the main project. This results in practically 0 time spent finding changes, updating dependencies and creating merge requests.
- Monitored overall service health (Resource usage, Response Time, and Up Time) as an on-call senior and system owner. Handled difficult and stressful situations where things weren't going as expected.
- Actively participated in weekly knowledge-sharing and chapter meetings discussing topics like standard algorithms and problems in JavaScript.
- Communicating with PMs, Designers, back end developers in cross-functional teams to find better API designs and user experience considering technical debts and limitations. Results in more than 30% fewer refactor per feature in two years.

Frontend Developer (Part Time)

Sep 2017 - Dec 2020

Sneeds

Tehran, Iran

Sneeds is an Iranian startup platform that offers professional academic consulting and immigration services. It has successfully processed more than 500 academic application requests, making it the first of its kind in the country.

- My responsibility was to develop a complete web application from scratch using Vue.js 2, which was the latest technology available at that time.
- I was in charge of communicating with the team and designing features and UI kit.
- My responsibility was to oversee the technical hiring process for the startup.

Skills: Vue.js Nuxt.js HTML5 CSS Nginx Git Node.js Javascript

Frontend Developer (Contract)

[Medad AI](#)

Tehran, Iran

Medad AI is a cutting-edge company that specializes in providing innovative solutions to businesses in Iran. Its primary focus is on offering SaaS platforms that leverage the latest advancements in artificial intelligence (AI). Their flagship products include Recommender systems and Search platforms, which are designed to help businesses enhance customer experience and increase sales conversions.

- On a contract basis, I took charge of developing the company's user panel using React.js from scratch.
- I was responsible for developing the UI component library for the panel.

Skills: React.js Redux.js

Frontend Developer (Contract)

Vesal

Tehran, Iran

Vesal is a leading Iranian media platform that provides users with access to a diverse range of cultural media, from music and podcasts to news and documentaries. Their mission is to make it easy for Iranians to discover and access relevant cultural media in one convenient platform.

- I developed the company's main website from scratch using Nuxt.js.
- My responsibilities included developing features such as music queues, playlists, and more.

Skills: Vue.js Nuxt.js Node.js

EDUCATION

Bachelor of Computer Engineering, Amirkabir University of Technology

2017 - 2021

EXTRA-CURRICULAR ACTIVITIES

- I volunteered for [Kaaryar](#) courses by creating course materials, mentoring, and teaching. Kaaryar aims to empower individuals with limited access to teaching materials and technology by providing them with the necessary resources to enhance their education and career prospects.

OTHER PROJECTS AND WORKS

Vuln Dependecy Checker I designed, coded, and released a software vulnerability detection system that scans for known supply-chain dependency vulnerabilities, stores the data, and presents it back to the user in a user-friendly and visually appealing manner. [Core - CLI Source](#)

I developed a Web UI by integrating MUI and React that visualizes dependency graphs for JS (npm, yarn) and Java (maven) projects. The UI also highlights any security vulnerabilities found during the scanning process in different colors for improved visibility and ease of use.
